

How to unpack

Your DUO fireplace will arrive in a plywood transport box.

In order to open the box, it is necessary to have the following tools.

1. Screwdriver (electric screwdriver is preferable).
2. Bit for cross screw
3. 13 mm wrench/ Ratchet wrench/ Adjustable spanner

How to open the box

Remove the screws placed in the front plate - the right and left side first. Unscrew the top plate. Remove the front plate and continue with the rest of the screws and remove the rest of the box sites.

Remove the safety board.

To remove the safety board you need a 13 mm wrench or ratchet wrench or adjustable spanner.

Unscrew the 2 coach screws and lift of the board.

Now you are ready to lift of the fireplace from the transport pallet.

Lift your fireplace gently from the transport pallet (use the rail for lift – 2 people recommended.)

Then remove the rest of the packaging.

Now you need to assemble your fireplace before use.

Place the safety hood on the chimney pipe and lift the assembly on to the fireplace.
