

Kitchen Island

RÖSHULTS

The Kitchen Island

The Kitchen Island is perfectly suited to accommodate the discerning individual. Made upon order, Röshults Kitchen Island is customized according to your individual preferences. Combining style and functionality with an innovative approach, we aspire to create an outdoor kitchen for beautiful moments. A practical outdoor kitchen, carrying the timeless elegance of Röshults, made to meet and exceed your expectations.

A Variety of Choices

The Röshults Kitchen Island leaves no detail to chance. Its solid stainless steel base, combined with your selection of modules, results in a practical and stylish outdoor kitchen. Below each module, there is a large storage compartment with removable shelves. The doors to the storage compartments have a convenient push-to-open function, and for each compartment, you can select between our standard door-, drawer- and fridge sections. All specially designed for the ultimately functional outdoor kitchen. With the additional bar area, your Kitchen Island becomes a natural centre for social gatherings.

Made upon order, Röshults Kitchen Island is customized according to your individual preferences. It is available either with or without the bar, enabling you to personalize its size and functionality. The frames are adjustable in length, ranging from two to eight modules, and each frame is adapted for gas hoses and water pipes. The frame and the doors are available in either natural stainless steel or anthracite coating.

Barbecuing has never been more elegant.

New technical solution

The Kitchen Island is delivered flat packed, which makes it easy to move and transport. It also enables features such as making the top commutable.

KITCHEN ISLAND WITHOUT BAR SECTION

3 | THE CABINETS. Select between standard door section, drawer section and fridge section. Each cabinet offers a large storage space. The standard door section comes with one removable shelf, and the door has a practical push-to-open function. For the drawer section, one or two extra drawers can be added to optimize the storage space. The fridge section offers a practical solution for storing a variety of food in your outdoor kitchen.

THE FRIDGE.

NOTICE: can only be selected with cabinet.

COOLMATIC CRD 50S

Storage volume (approx.): 38.5 l

Voltage: 12/24 V DC

Average power consumption: approx. 40 W

Current consumption: 1.5 Ah/h at +25 °C ambient temperature, 1.8 Ah/h at +32 °C ambient temperature, both at +5 °C interior temperature

Temperature range: Fixed point temperature preset at +5 °C (±1 °C)

Insulation: Polyurethane (PU) foam all around

System: Automatic reverse pole protection. Fully hermetic compressor with integrated control electronics. Low voltage protection / electronic fuse. Mechanical, continuously variable thermostat

Material:

Body: with coated metal frame;

Interior: Plastic;

Fittings: Stainless steel;

Door: Stainless steel (AISI316)

Colour: body: black, door: stainless steel

Measures (L x D x H): 380 x 500 x 534 mm / 19.7 x 15 x 21 in

Weight (approx.): 19.0 kg / 42 lb

Supplied with: Removable wire basket

Test marks: TÜV/GS, e-certified (Automotive EMC Directive)

COOLPOWER MPS 35

Mains voltage: 110 – 240 volts AC

Output voltage: 25 V DC

Output power: 75 W

Battery voltage: 12/24 V DC

Output current: 3 A

System: Switch mode, automatic priority for mains operation

4 | THE FRAME. Select between natural stainless steel and anthracite coating.

5 | THE DOORS.
Select between natural stainless steel and anthracite coating.

6 | THE TOP.
The Bar Top is available in natural stainless steel or anthracite coating.

7 | THE MODULES. Personalize your Kitchen Island with the modules of your choice.

MODULE BBQ GRILL

Our popular BBQ Grill, now as a module for your Kitchen Island! Our BBQ Grill is a high-quality charcoal barbecue, made for the designer outdoor kitchen. Our BBQ Grill was the first grill we introduced, and it has remained one of our most renowned products ever since.

Design: Broberg & Ridderstråle

Materials: Stainless Steel

Measure cm: L 50 D 50 H 28,5

Measure in: L 19,7 D 19,7 H 11,2

Weight: 30 kg / 66 lb

Colours: Anthracite

MODULE BBQ GRILL GAS X1

The cousin of our charcoal barbecue, our BBQ Grill Gas is a high-quality gas barbecue, made for the designer outdoor kitchen. The module includes a fixed frame with lid that captures the heat from the grill, and creates an even and hot cooking temperature. The handle is crafted from teak to add warmth to the otherwise clean design. LPG 30 mbar, pipe 8-10 mm.

Design: Broberg & Ridderstråle

Materials: Stainless Steel, Teak handle

Measure cm: L 50 D 50 H 43

Measure in: L 19,7 D 19,7 H 16,9 in

Weight: 38 kg / 83,8 lb

Colours: Anthracite

MODULE KITCHEN SINK

Our Module Kitchen Sink is a practical as well as beautiful addition to your outdoor kitchen. The module version of our popular Garden Kitchen Sink, it combines a classic design with high-quality materials. The connection of water meter is with thread G½ (LINK), the drain pipe has an outside diameter of 40 mm, and the hose is surface mounted and secured with a hose clamp.

Design: Broberg & Ridderstråle

Materials: Stainless Steel

Measure cm: L 50 D 50 H 28,5

Measure in: L 19,7 D 19,7 H 11,2

Weight: 30 kg / 66 lb

Colours: Anthracite

MODULE COOKER HOB

Our Module Cooker Hob adds a classic touch to your outdoor kitchen. The gas burner is easy to adjust and regulation of the heat is immediate. The outdoor kitchen has never been more versatile, or practical!

Design: Broberg & Ridderstråle

Materials: Stainless Steel

Measure cm: L 50 D 50 H 28,5

Measure in: L 19,7 D 19,7 H 11,2

Weight: 25 kg / 55 lb

Colours: Anthracite

MODULE CUTTING BOARD

Our Module Cutting Board is one of the pieces made for Røshults Kitchen Island or a custom built outdoor kitchen. Made of high-quality teak, our Module Cutting Board is not only practical but also stylish - an aesthetically appealing addition to your Kitchen Island.

Design: Broberg & Ridderstråle

Materials: Teak

Measure cm: L 50 D 50 H 28,5

Measure in: L 19,7 D 19,7 H 11,2

Weight: 39 kg / 86 lb

Colours: Natural Wood

MODULE DRAWER UNIT

Our Module Drawer Unit is made of high-quality stainless steel and consists of one capacious drawer. Designed to be convenient and practical, it provides the necessary storage space to optimize your cooking.

Design: Broberg & Ridderstråle

Materials: Stainless Steel

Measure cm: L 50 D 50 H 28,5

Measure in: L 19,7 D 19,7 H 11,2 in

Weight: 30 kg / 66 lb

Colours: Anthracite

8 | THE ACCESSORIES. Upgrade your outdoor kitchen with the accessories of your choice.

LID FOR CHARCOAL GRILL

Designed to suit our Module BBQ Grill and Module BBQ Grill Gas. Made of stainless steels and with handles of teak, it is a durable and stylish addition to your outdoor kitchen. By capturing the heat from the barbecue, it enhances flavors in the food, while making cooking more effective!

FIXED FRAME WITH LID FOR CHARCOAL GRILL

Has a frame available in Stainless Steel or Anthracite, is a more robust version of our original Lid. It captures the heat from the grill, and creates an even and hot cooking temperature. Barbecuing becomes more effective, and the food even more delicious.

WINDSHIELD FOR BBQ 100 FOR CHARCOAL GRILL

Protects your barbecue and its surroundings in an elegant manner. It is made of stainless steel, making it a durable and stylish addition. With our Windshield For BBQ 100, your terrace is protected from splashes from the grill, and your food is protected from the wind.

WINDSHIELD W COVER LID FOR COOKER HOB

Our Windshield for Cooker Hob offers protection from wind, while the lid keeps your Cooker Hob dry when not in use. Made of stainless steel, its durability and high quality makes it perfect for your outdoor kitchen. Designed to fit our Cooker Hob.

FRY TOP FOR CHARCOAL GRILL

Made for our Module BBQ Grill and Module BBQ Gas Grill, enables you to cook all of your favorite types of food in your outdoor kitchen. It can be used for pancakes, potatoes, vegetables, bread and much more. The outdoor kitchen has never been more flexible, or fun!

WORK PLATE FOR CHARCOAL GRILL

Used to arrange and store food, is made for our Module BBQ Grill and Module BBQ Gas Grill. Placed on a warm barbecue (when you're done cooking!), it provides a warm surface, perfect for keeping your food nicely warm.

WOKHOLDER FOR CHARCOAL GRILL

Enables you to cook more Asian-inspired food in your outdoor kitchen. With a simple and practical design, made for our Module BBQ Grill and Module BBQ Gas Grill, it is useful as well as elegant. Add some variation to your barbecue dinners, and make a delicious wok tonight.

LUXURY GRIP FOR COOKING GRATE/CHARCOAL GRILL

Designed to give your barbecue that extra luxurious touch. Made of high-quality leather, available in two stylish colors, it adds to the looks of your outdoor kitchen while being useful and practical.

BOTTLE RACK

Our Bottle Rack, whether in your dining area, outdoor kitchen or wine cellar, stores your wine in a practical and stylish manner. Made of solid teak, it is designed for ultimate stability, giving your outdoor kitchen an extra luxurious touch.

TRAY

Our Tray is designed for the exclusive outdoor kitchen. Combining solid teak with distinctive proportions, it has a natural durability, and it is practical as well as beautiful. Perfect for serving your barbecue dinner in a stylish manner!

CUTTING BOARD

Our Cutting Board is designed for stability and style, with distinctive proportions perfect for the outdoor kitchen. Made of solid teak, it has a natural durability, and it is beautiful as well as practical. The ideal cutting board for preparing your food before barbecuing!

BBQ GLOVES

Our BBQ Gloves protects your hands in a stylish manner. Designed for ultimate quality and heat resistance, our gloves are made of strong Suede leather and durable Kevlar threads, ideal for the oven and stove as well as for the barbecue.

GARDEN BAR CHAIR LOW

Our Garden Bar Chair Low is a bar-stool with a minimalist design, made for the Kitchen Island bar. Combining strict lines with teak and stainless steel, it has a natural elegance, perfect for the exclusive bar area. For extra comfort, we recommend adding our stylish Sunbrella cushion.

BBQ APRON

Adding to our popular range of outdoor kitchen products, we now offer the perfect utensils for the designer outdoor kitchen. With their exclusive materials and timeless style, our new Barbecue Tools are a must for the barbecue lover!

BBQ TOOLS

Adding to our popular range of kitchen products, we now offer the perfect utensils for the designer outdoor kitchen. With the same timeless design and elegant style as our grills, our new Barbecue Tools are a must for the barbecue lover!

LUXURY COVER

Our Kitchen Island Cover protects your Kitchen Island in a stylish manner. With its high UV-, water-, mould- and mildew-resistance, you can feel confident that your Kitchen Island is kept safe from damage.

Maintenance

STAINLESS STEEL

Stainless steel is not completely maintenance free. The steel we use is a stainless quality steel and is of type 304, but it requires maintenance to preserve its finish. Some of our products are covered with a plastic foil. The foil protects during transportation. After installation, it shall be removed before using the product.

Care instructions:

Always wipe your product after use. Use mild soap and lukewarm water. To avoid gray coating on the surface, do not let water or other liquids dry into the stainless steel.

1. Sprinkle dry powdered detergent, such as washing powder on the surface.
2. Rub the powder gently on the surface with a damp sponge.
3. Wash thoroughly with cold water.
4. Wipe the surface dry with a dry soft cloth

Removal of lime coatings:

Lime deposits caused by water evaporation on the surface can be removed with any of the following solutions: Vinegar, vinegar 10%, Diluted nitric acid (1/5 HNO₃, 4% water). During treatment with nitric acid you should have a good ventilation in the area. Otherwise, it's the same handling regulations as for strong acids. After treatment with any of the above solutions, rinse the surface thoroughly with cold water and wipe it dry with a soft polishing cloth.

Removal of rust coatings:

Rust coatings which have not been a longer time on the surface can normally be removed by using a mild scouring powder. Rub the dry scouring powder gently against the steel surface with a damp cloth, wash with cold water and wipe dry with a soft cloth.

If rust coatings have been dry out for a long time on the stainless steel it usually occurs a certain discoloration from the corrosion-products in the surface. This results in discoloration after the rust has been removed as above. In such cases we recommend alternative brushing with dry nylon fiber brushes or rust removal with dilute nitric acid HNO₃, diluted with 4 parts water. Rinsing and drying as above.

COATING: AKZO NOBEL NOIR 2200 SABLÉ YW360F

Finishes on all our furnitures are made with AkzoNobel's Interpon D2525 technology. Interpon D2525 is an ultra durable powder coating, which meets the demanding weathering requirements of the leading industry specifications Qualicoat Class 2, GSB. Master, and AAMA 2604-05, as well as BS EN 12206.

TEAK

Teak is a golden-brown timber, with excellent grains and texture. It is one of the most demanded wood types in the entire world, due to its beauty and unique properties. Unlike other woods, teak does not warp, crack, become brittle or discolor when in contact with metal, making it an ideal choice for marine use. It is also one of the select few woods that has a naturally high oil content, making it resistant to rotting caused by climatic extremes such as water damages. With its high durability, teak has been a mainstay in the boat building industry for centuries, for use in decking and construction. Teak is also an ideal choice for garden furniture, especially since its natural oil content gives it a high resistance to termites and other insects.

Care instructions:

Teak does not need to be protected. It is a unique wood that if left in its natural state, is virtually maintenance-free. Teak can be left outside year around, surviving even the most extreme weather conditions. Although over time, untreated teak furniture which is exposed to the sun will develop a patina and a silvery, grey color. This process is cosmetic and does not harm the strength or quality of the wood.

Teak sealer is often recommended to preserve the natural honey color. Teak sealer contains UV protection to keep the sun from graying the furniture as well as a fungicide to prevent the growth of mould and mildew on the surface of your furniture. Sealer is not the same as varnish. It is meant to preserve the color of the wood and is breathable, letting the natural oils escape without bubbling or peeling like varnish. Sealers and preservatives serve both as protectants and stains. Generally, the darker the stain, the more sun protection it provides, and the less often it needs to be reapplied. Applying the preservative is straightforward. On the first application, the wood should be allowed to stand in the sun for a week or two to allow the wood grain to open. A coat of teak sealer should be sprayed on and rubbed in. Two coats should be applied in this manner. The area underneath the furniture should be protected with a drop cloth or newsprint as most sealers will stain concrete. After the first application, teak sealer should be reapplied every year by cleaning the wood with mild detergent and water and spraying and rubbing in a coat only on the surfaces that get sun.

After the furniture is sealed, very little care is needed to preserve the finish. Occasional washing with soap and water will remove normal soil. Oils from foods, wine, coffee and some condiments will penetrate the sealer and may leave a stain. To avoid this, a teak clear coat can be applied to the table top to improve stain resistance.

It is recommended to wipe off any stain with water and detergent, including normal dirt, stain and spores with mould/fungal or other mouldy/fungal residue. For stubborn stains, use a soft-bristled scrubber (such as kitchen/pot scrubber). Please do not cover your furniture with plastic or any similar material. This will prevent natural airflow, which will cause the timber to sweat and increase humidity. Mould may appear as a result.

It is important to store your furniture in a dry place with good air ventilation. Do not store your furniture near extreme temperature such as a heater. This may cause the timber to shrink/expand and make the joints crack.

Do not expose teak to extreme hot or cold temperatures, such as a hot saucepan/flame or dry ice. This will leave a mark on the furniture. Always use placemats to protect your furniture.

Staining

Please note, once you stain your teak, you cannot return to the natural golden brown or weathered silver-grey color without sanding off the stain. Stain is intended to be permanent. If you choose to stain your furniture after it has turned silver-grey, you must first sand it before applying stain. Do not leave your teak furniture in puddles of water or on wet ground. Cover your teak furniture during the winter months or move indoors if in northern climates.

We use untreated plantation FSC teak on all our furniture. This is a natural product which may vary in colour and texture, wood is a product of nature, and as such, no two pieces are exactly alike. The colours in the photographs may vary slightly from the actual products but we always endeavour to provide the best quality timber and finish possible.

Attention:

Teak can at the first contact with moisture react by grain raising. This is solved by using a finegrained sandpaper.

Material Selection

TEAK

A timber with natural golden brown nuance, beautiful fibres and good texture. With its unique traits, it is one of the most desired woods in the world. It does not whip, crack or turn brittle, nor does the colour alter when in contact with metal. Its naturally high oil content makes it resistant to rotting as well as insects. It is virtually maintenance free. Do note that teak, when exposed to the sun, will develop a silvery patina over time. Although it does not harm the quality, you can consult your local paint store if the original colour is preferred. We deliver our products untreated, letting the client decide. Also take into account that teak can react to its premier contact with moisture by grain rising. This is solved by using a fine-grained sandpaper.

Certification: FSC

STAINLESS STEEL

Our Kitchen Island is made of the extra weather resistant AISI316L (EN 1.4404).

Stainless steel is not a single alloy, but rather the name applies to a group of iron-based alloys containing a minimum 10.5% chromium. Other elements are added and the chromium content increased to improve the corrosion resistance and heat resisting properties, enhance mechanical properties, and/or improve fabricating characteristics.

AKZO NOBEL FINISH

A coating made with Akzo Nobel's Interpon D2525 technology. It is an ultra durable powder coating, meeting the demanding weathering preventive requirements of leading industry specifications.
